Education

Hasso Plattner Institute, University of Potsdam	2023 — now
M.Sc. Software Systems Engineering	Potsdam, Germany
Frankfurt University of Applied Sciences	2018 — 2022
B.Sc. Computer Science	Frankfurt, Germany

Work Experience

SAP	2023/10 — now
Software Engineer - Working Student, Big Data Team	Walldorf, Germany / Remote
• Built Go CLI for managing Kafka, Cassandra, and Spark infrastructure. • Evaluated OSS Cassandra Operators and delivered PoC for Kubernetes deployment. • Developed TypeScript library for Kafka message encryption with Customer-Managed Keys (CMK). • Migrated RAML APIs to OpenAPI, enabling SDK generation in Python & Go and improved documentation.	
Icahn School of Medicine at Mount Sinai	2025/10 — now
Data Engineer - Visiting Researcher	New York, USA / Remote
• Developed pipelines to extract genetic variants from unstructured PDF reports and map to biomedical standards. • Expanded clinical data infrastructure to enable large-scale genetic research and precision medicine applications.	
HireLinks	2025/05 — now
Cofounder & Lead Developer	Hamburg, Germany / Remote
• Built full-stack job aggregation platform using Go backend and React frontend. • Designed and implemented automated data pipeline to scrape and process job listings from multiple sources. • Tech Stack: Gin, React, JWT, OAuth2, PostgreSQL, Redit, GCP, Go, Python, TypeScript.	
Data4Life	April 2023 — June 2023
Working Student Site Reliability Engineer, Core Platform	Berlin, Germany

Projects

Hyrise – Seminar: <i>Develop Your Own Database</i>	
• Built OpposumDB in-memory database (C++) from scratch. • Contributed to  hyrise (★ 1k) research in-memory database: improved test coverage, optimized sort operators inspired by DuckDB, including Radix Sort, Parallel Merge Sort, and Normalized Key.	
Truffle Lox Compiler – Seminar: <i>Build Your Own Programming Language</i>	
• Built  tlox, a Lox interpreter in Java with functions, closures, classes, inheritance, and Truffle Bytecode DSL support.	
Cargo – Seminar: <i>Interoperability in Data Processing Pipelines</i>	
• Optimized writing of Pandas DataFrames to PostgreSQL using Go, Apache Arrow, and parallel execution, reducing Python object memory overhead.	
Data Lake & Warehouse in the Cloud for Healthcare Data – Bachelor Thesis	
• Built cloud data lake, data warehouse, and ETLT pipelines with realistic patient data. • Evaluated modern data storage & processing stacks: GCP Compute Engine, Dataproc (Spark), BigQuery, AWS S3, dbt.	

Skills & Awards

- **Programming Languages:** Go, Python, C++, Java, TypeScript
- **Technologies & Tools:** Database Systems, Data Engineering, AWS, GCP, PostgreSQL, Kubernetes, Docker, Git
- **Certifications:** AWS Cloud Practitioner, Data Engineering on GCP (Coursera), SQL Intermediate (Hackerrank)
- **Coding Contest:** 2× Third Place – Cloudflight Coding Contest (Frankfurt 2023, Munich 2024)
